

## **MAY 2022,**

May's full Moon, called the Flower Moon, appears on the night of Sunday, May 15, reaching peak illumination at 12:15 A.M. (EDT) on Monday the 16th. For the best view of this full Moon, step outside on the night of the 15th and look for that big, bright, shining lunar disk! One more interesting thing about this month's full Moon: it will coincide with a total lunar eclipse (visible in most of North America)!
